

REVISED - SYNTHETIC DEMO

This handbook is a synthetic demonstration for QuoteCarry.
Every policy and workflow described here is fictional.
Use these pages to inspect quotation movement and revision.
They are not documentation for a real organization or product.

REVISED - SYNTHETIC DEMO

New introduction

This page was inserted in the revised synthetic handbook.

It explains how revisions should be reviewed by the reader.

A page insertion changes physical PDF page indices.

It does not necessarily change the words of a saved passage.

REVISED - SYNTHETIC DEMO

1. Preparing the review

Review windows follow a fixed schedule.

Completed uploads remain available for seven days after review.

Reports arrive through a single submission inbox.

The review queue preserves the original
order of submitted reports.

The following rule describes the import process.

Failed imports are not retried automatically before the next review.

The comments panel has a dedicated export action.

Reviewers can export the full list of pending comments.

2. Comments and archives

A second copy of the export rule appears here.

Reviewers can export the full list of pending comments.

The archive section was rewritten for this revision.

Previous notes are discussed outside this synthetic handbook.
